

Hallo Kamil and Lukasz

I would like to present the following:

We are planning to use the electricity from the solar installation to be used by you.

The firm Voltego, located in Krefeld near Duisburg, wants to install that at Hauptstrasse 25/27, within 2 months.

It means that your electricity bill will be less, and in the future, in 2026, also the heating costs will be lower.

For the installation Voltego will do all the administrative work and organizes this with Stadtwerke Kleve.

I need for these 2 things from the Stadtwerke Kleve bill, the 33 digits DExxxx... and the location Id (11 digits) on that bill.

Is it possible you can show me this bill.

See here for the information:

[So funktioniert Voltego: Was ist Mieterstrom und wie können Mieter und Vermieter davon profitieren](#)

And see attachment for the legal aspects of Mieterstrom.

Greetings

Herbrand and Oksana Hofker
